

Responding to Suspected COVID-19 Cases

1

QUARANTINE THE STUDENT

In the event a student is experiencing symptoms related to COVID-19, the student will be separated from roommate(s)/others as soon as possible and placed in quarantine in a separate, dedicated space. This may be within the same housing location or a predetermined isolation housing location.

2

CONTACT THE PARENT OR GUARDIAN

The student's parent or guardian will be immediately notified of the situation.

3

CONTACT A MEDICAL PROFESSIONAL

The program team will contact either the nurse on site or our Doctors on Call team for guidance and instructions on the appropriate next steps. Elementary and middle school programs will have a nurse on-site for each day of the program and high school programs will have a nurse onsite every 3-4 days of the program. General nurse hours are from 7:30 a.m. to 10 p.m.

4

CONDUCT CONTACT TRACING

Based on roommate, classroom, and small group pod assignments, staff will identify anyone who may have been in direct contact with the student. Follow-up will occur with each group to assess if additional individuals may also be experiencing symptoms.

5

TESTING

A staff member will escort the student to a medical facility for additional health assessments and COVID-19 testing. The student will remain in quarantine while awaiting test results and will be restricted to their assigned quarantine room. Meals and any other requested accommodations will be brought to the student's sleeping room throughout the quarantine period.

Questions? Contact the Office of Admissions at 866-858-5323 or 703-584-9380

We are currently evaluating all aspects of our programs and incorporating the most up-to-date health and safety standards. We'll continue to make changes as new information and guidance evolves from the Centers for Disease Control and Prevention (CDC) and our program partners. Stay informed by visiting our website:

Post Testing Procedures

POSITIVE TEST

A parent/guardian will be informed of the test results.

.....

If a student tests positive for Covid-19, they will remain in quarantine and will not return to in-person classes or participate in any activities for the duration of the program

.....

With direction from a medical professional and permission from a parent or guardian the appropriate over-the-counter or prescription medication will be procured on behalf of the student.

.....

Roommates and any other persons that have come in contact with the student will also be asked to quarantine and/or may be tested.

.....

If the length of quarantine or isolation will exceed the length of the program, we will work with families/guardians to determine if the student will isolate or quarantine at home. In the event that the family is unable to arrange “private vehicle” transportation back home, we will work through options to determine the appropriate quarantine or isolation method.

NEGATIVE TEST

A parent/guardian will be informed of the test results.

.....

Symptoms will continue to be monitored and the student will not return to in-person classes or participate in activities until completely recovered. In some cases, a second COVID-19 test may be recommended.

.....

Staff will follow guidelines from local health authorities prior to placing a student back with roommates or rejoining program activities, and medical clearance will be sought.
